How it started

Rooted Forward was started by Zain Zaidi, a student who lives on the Near South Side and goes to school in Hyde Park. Going between the two every day, he kept running into the bubble around the University of Chicago, and how completely the city changed from one block to the next.

He went looking for why, and found redlining, restrictive covenants, and the urban renewal campaigns that cleared and rearranged these blocks on purpose.

Students in other large American cities had seen the same patterns where they live, and joined him.

We are active in Chicago, New York, and Washington, DC.

Leadership team

Zain Zaidi
Chicago
University of Chicago Laboratory Schools

Ayomide Olatunji
Chicago
Harvard University

Sammar Agha
Dallas
Greenhill School

Osheanna Tyler-Hudson
Chicago
DePaul University

Sabina Aliyev
New York
Xaverian High School

Javonte White
Chicago
Collins Academy High School

We could use your help

We want to partner with people and organizations who can help us bring this message to more people. If you or your organization would like our materials, we are happy to supply them.

We are also looking for people to help with archival research. You do not need experience to start.

Rooted Forward

Cover map drawn from Home Owners' Loan Corporation records, 1940, by way of Mapping Inequality, University of Richmond. Streets and shoreline on both maps from U.S. Census TIGER/Line.

Rooted Forward

A student-run nonprofit started in Chicago. Rooted Forward raises awareness of racial inequality in cities across the United States, and works to address it through education and political advocacy.

The Home Owners' Loan Corporation's grades for Chicago, 1940. The neighborhoods shaded red were the ones banks were told to stay out of.

Ways we help

The route of Walk Hyde Park, the first tour in the app.

The map and its touch screen on the museum's wall in Bridgeport, September 2026. Photograph by Rooted Forward.

Self-guided walking tours

Students research one neighborhood at a time and build a tour out of what they find. It lives on the Rooted Forward app, free to walk or to read at home.

Community outreach

We meet people where they already are, at farmers' markets and at the Obama Presidential Center, and we survey and interview residents about their own block.

Museum partnerships

We partner with museums, among them the Glessner House, the Japanese American Service Committee's Legacy Center, and the Chicago Maritime Museum, where our exhibit on a 1931 illustrated map of Chicago is on view.

School visits

We visit schools and present our research to students. Hyde Park Academy is one of them.

Policy advocacy

We run petitions on bills that are already introduced and stuck in a committee, then submit the signatures as public comment.

Archival research

Our students work in neighborhoods across Chicago, New York, and Washington, DC, and do the archival research behind everything we publish.
